BRA: Design & Technology

At the heart of every home lies the kitchen, and at the centre of every kitchen, our innovative cookware.

As market leaders, at BRA®, we understand that excellence in cookware comes not only from functionality but also from innovation, design, and advanced technology.

From frying-pans with new non-stick coatings to novel utensils that make food preparation easier, each product is a testament to our relentless pursuit of enhancing the culinary experience.

Our products have been designed in Barcelona by some of the best design studios, based on the latest market trends.

Sustainability in Every Step: Our products are more than just items; they are part of a movement towards a greener future.

This year, we have redefined our goals to ensure that every product is environmentally friendly, from recycled materials to more sustainable production and packaging.

Recycled Aluminum: We understand the importance of preserving our natural resources. That's why most of our products will now be made with 100% recycled aluminum. This initiative not only reduces the demand for aluminum extraction but also significantly lowers our carbon footprint processes.

Eco-Friendly Packaging: We say goodbye to plastic and welcome cardboard and paper from responsibly and sustainably managed forest sources.

A Sustainable Future: Our vision is to be leaders not only in quality but also in environmental responsibility. Our goal is that at least 60% of our sales in 2025 be products made from recycled materials.

At BRA®, cooking is a passion, both for those who enjoy our products and for the planet that hosts us. Join us on this journey towards a more sustainable kitchen.

ALUMINUM

PFOA FREE

Cast aluminum pieces are suitable for all types of stovetops, and they can also be used in the oven. The combination of this material with the application of the best non-stick coatings (PFOA-free) allows for cooking with minimal use of oil or fat, meaning healthier cooking. BRA® offers modern and elegant designs, striving to provide their products with maximum functionality and versatility to achieve the best performance in the kitchen..

INFINITY *Forever Cooking*

Fundición de aluminio
CAST aluminium

6
mm

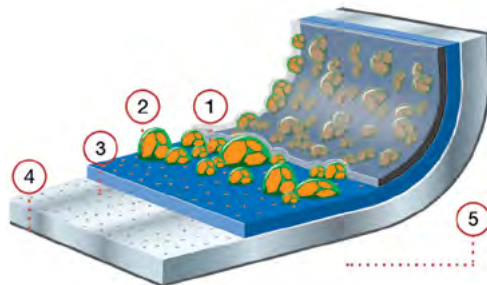

Highly deformation-resistant cast aluminum cookware with a cutting-edge design. Now featuring the ultra-durable Teflon™ MAX nonstick coating, PFOA-free, and offering 50% more resistance to abrasion and scratching than its predecessor, Teflon™ Profile. **Removable handles** for maximum functionality in the kitchen. Oven-safe up to 220°C. Easy to store and space-saving. Easy to clean and suitable for all types of stoves, including induction. Infinity stands for excellence and practicality in the kitchen, now with the most resistant non-stick coating.

- Great non-stickness and PFOA free
- Fat free cooking
- Maximum heat output
- Very thick 6 mm base
- Full Induction energy saving system
- Tempered glass lid with valvule and anti-impact silicone ring
- Ergonomic handle for a perfect hold
- Cookware suitable for the oven (without lid) up to 220°C
- Suitable for all kind of cooktops, including induction
- Easy inside and outside cleaning
- Designed by Josep Llusca

- 1 Premium coating PFOA free
- 2 Reinforced midcoat with silicon carbon formations. Maximum non-stick layer
- 3 Primer incorporating ceramic
- 4 Undeformable cast aluminum with MetalTec enhancement
- 5 Non-stick outside coating

Designed by
JOSEP LLUSCÀ

The Efficient cookware collection is the best-selling cast aluminum range in Spain. It has established itself as the defining collection of the brand, becoming an identity of its own, synonymous with quality, robustness, and extraordinary non-stick properties. Featuring a triple-layer Teflon™ Platinum Plus non-stick coating, PFOA-free, it is designed for maximum robustness and great resistance to deformation, not only due to the material used, but also due to the careful study of thicknesses in each of the risk areas. Efficient is the most successful collection, widely recognized on social media, television, and other media, and also has the widest range of products in the market

5 mm

- Great non-stickness and PFOA free
- Extraordinary scratch resistance
- Full Induction energy saving system
- Very thick 5 mm base
- Detachable soft-touch handles on frying pans
- Removable silicone handles on casserole dishes
- Tempered glass lid with valve & silicone anti-impact ring
- Maximum heat output
- Fat free cooking
- Cookware suitable for the oven (without lid and handles) up to 220°C
- Suitable for all kind of cooktops, including induction
- Fully stackable

Compac Pro cookware revolutionises kitchen storage with its innovative space-saving, stackable design. All pieces are made from high-quality cast aluminum, ensuring even heat distribution for precise and even cooking. Its cutting-edge non-stick coating, free of PFOA, lead, and cadmium, allows for cooking with less oil and makes cleaning easier. It's compatible with all stovetops, including induction and ovens. And it's extraordinarily scratch-resistant allowing for everyday use without compromising on performance. The frying pan handle is removable with a soft-touch finish and easy snap-on fit, creating a secure and reliable grip. The casserole dishes have removable silicone handles. And the lid is made using tempered glass with a valve and anti-impact silicone ring.

Hybrid Cell

ACERO
INOXIDABLE
18/10
STAINLESS
STEEL

2.5
mm

- 1** 18/10 austenitic stainless steel on the interior for completely safe food contact, with a thickness of 0.5 mm.
- 2** 1.5 mm thick aluminum layer that covers the entire body of the pan, not just the base.
- 3** 0.5 mm thick outer layer of 430 stainless steel with 18% chromium to create an excellent magnetic field.

The Hybrid Cell pan comprises of three layers; one aluminium layer between two layers of stainless steel. The aluminium layer extends throughout the pan allowing heat distribution to rise along the walls of the pan, which is useful for certain cooking methods that require a large volume of food exceeding the base of the pan, such as stir frying. The entire exterior material is 18/10 stainless steel (AISI 430), making it magnetic. This makes it the perfect cookware for induction stovetops, generating a highly efficient magnetic field and requiring less energy from the induction cooktop. There are 4 sizes of pan available. It has a PFAS free, ceramic non-stick coating and it is dishwasher and oven safe.
